Gaomi Jiacheng Machinery Technology Co., Ltd.

Features of Servo Control System Sizing Machine

The technical team of **Gaomi Jiacheng Machinery Technology Co., Ltd.** has always adhered to a strategy of technological development. On the basis of introducing, digesting, and absorbing advanced foreign technologies, the company has further upgraded and innovated its systems. After nearly ten years of exploration and improvement, the company's **synchronous servo control system** applied to sizing machines has achieved unprecedented breakthroughs.

1. Outstanding Performance and Efficiency

While ensuring extremely stable sizing quality, the actual running speed has successfully reached or approached **200 meters per minute** (depending on the yarn type and process requirements), nearly **double** the previous speed.
Steam cost reduced by about **30%** (for standard varieties) **Total power consumption** reduced by **30–40% Yarn quality** significantly improved: Hair adhesion rate increased by **20%** Warp breakage rate decreased by more than **50% Sizing material cost** reduced by **10–20% Weaving efficiency** steadily improved, with some varieties achieving a **daily output of over 230,000 meters** Overall, the sizing cost has been significantly reduced.

2. Intelligent Control System

By using precise **synchronous servo control** combined with strong computing power, the system automatically adjusts based on the characteristics of different yarn types, realizing the transformation from **automation to intelligent control**.

3. Stable and Reliable Mechanical Execution

The stable mechanical execution structure works perfectly with the synchronous servo system, achieving a seamless combination of **high speed** and **smooth operation**. The servo control features high precision, high rotational speed, and high response — with an acceleration time of **0–2000 rpm in just 20 milliseconds** — fully demonstrating its advanced motion control capabilities.

4. Proven Reliability and Ease of Operation

With over **30 years of on-site experience**, the high-performance servo-controlled sizing machine ensures both **reliability** and **smooth operation**. After parameter settings are completed, the machine automatically determines running speed based on yarn moisture regain. Key features include: **One-touch start-up and acceleration Automatic tension control** across all zones **Automatic moisture control Automatic temperature control** These functions greatly reduce operator workload and skill requirements, minimizing human impact on sizing quality and making the equipment **simple to learn and easy to operate**.

“There is no best, only better.”

With continuous progress in hardware performance, **Jiacheng Machinery Technology** will continue to move forward, relentlessly pursuing **high standards, strict quality, and excellent service** to help customers **reduce costs, improve efficiency, and increase profitability**.

Gaomi Jiacheng Machinery Technology Co., Ltd.

Your trusted partner in high-end sizing machinery.
