FAV Group of Companies

Rise together!

At FAV Group of Companies, we provide advanced **Textile Sizing Solutions** designed to enhance weaving efficiency, yarn strength, and fabric quality. Our high-performance sizing chemicals ensure excellent adhesion, reduced yarn breakage, smooth weaving performance, and improved productivity across various textile applications.

We offer reliable and customized solutions for cotton, polyester, blended, and synthetic yarns, helping textile manufacturers achieve consistent quality with cost-effective processing. With a focus on innovation, performance, and sustainability, FAV Group delivers products that support modern textile industry requirements while maintaining international quality standards.

Our Solutions Include:

Textile Sizing Chemicals
Modified Starch Solutions
Acrylic & Synthetic Binders
Lubricants & Softeners
Desizing & Finishing Support Chemicals
Customized Formulations for Different Yarn Types

Why Choose FAV Group?

Consistent Product Quality
Enhanced Weaving Performance
Reduced Yarn Breakage
Technical Support & Custom Solutions
Industry-Focused Expertise
Reliable Supply Chain & Service

FAV Group of Companies is committed to delivering innovative textile chemical solutions that improve operational efficiency and support the evolving needs of the textile industry.

TEXTILE SIZING SOLUTIONS

Complete Sizing Solutions for Modern Textile Weaving

- Reliable
- Consistent
- Performance Driven

1- Emulsified Waxes (Palm Oil Based) ZDHC, GOTS & Chem check

CD-52A – High-performance Premium grade Palm oil-based wax emulsified wax for smooth yarn surface and reduced friction during weaving.

CD-52 – High-performance regular grade Palm oil-based providing excellent flexibility, abrasion resistance, and weaving efficiency.

CD-520 – High-performance economical grade Palm oil-based designed for commercial units for softness and improved loom performance.

2- Softener (GOTS approved)

Hi-Soft CTS – Specialized sizing softener enhancing yarn flexibility, smoothness, and anti-static properties.

3- Binder / Acrylic (ZDHC, GOTS & Chem check)

CD-885TM – High-strength Modified grafted starch binder for excellent film formation and yarn adhesion.

CD-885-S – Modified grafted starch binder offering superior weaving efficiency and reduced yarn hairiness.

CD-AR100 – Economical acrylic binder with strong binding and flexible film characteristics.

Vee Acrylic AA – Premium acrylic additive for enhanced adhesion, flexibility, and sizing stability.

4- Polyester Resin / Binder (ZDHC, GOTS & Chem check)

CD-PEF 850.gr – Granular polyester special resin providing strong film strength and excellent abrasion resistance.

CD-AR200 – High-performance polyester-based binder for durable and flexible sizing films with water resistance properties.

CD-PEF-850.liq – Liquid polyester resin ensuring smooth application and improved yarn protection for FDY, DTY and POY Filament yarn.

5- CMC Series

CMC-T300 – Economical CMC grade for improved viscosity and basic film-forming performance.

CMC-T1000 – Medium viscosity CMC for enhanced adhesion and smooth weaving performance.

CMC-T1500 – High-quality CMC delivering excellent binding, flexibility, and reduced yarn breakage.

CMC-T2000 – Premium high-viscosity CMC for superior film strength and maximum loom efficiency.

6- Partially Hydrolysed PVA

BP/17A – High-quality partially hydrolysed PVA with excellent adhesion and flexibility for textile sizing.

PVA-2688 – Industry-standard PVA offering strong film formation, abrasion resistance, and weaving performance.
