公司简介
Company Profile

风雨共舟　携手共赢

当太阳第一次照亮大地，生命开始衍生。

今天，[illegible]，在16000平方米的[illegible]，创造了一个又一个辉煌，[illegible]。

[illegible]，“做一件产品，树一座丰碑”，[illegible]。

[illegible]。

[illegible]。

[illegible]。

When the sun lightens up the earth for the first time,life begins.

Today, Bka creates one after another glory with unique way of thinking,strong endurance the impact of the brook of pioneer in the land of 16000 square meters and summon up courage form in the international textile machinery industry.

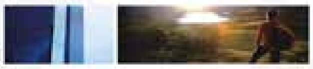
In the long river of time,there is infinite wisdom and hope, which shapes spirit of strength and optimism. "Do a production as a milestone." Passion and fortitude, enthusiasm and conviction,have hammered out elaborate and excellent team that imbue in fighting capacity and [illegible] enterprise spirit of integrity ,harmony, struggle and innovation.

High prestige,high prospect.

Continuously exceeding quality,partners trusted by customers, creating famous brand, along with your company, have become our eternal faith.Bka always shake hands with cooperative partners and shapes win-win relationship.

为客户制造价值
是我们一成不变的追求
QINGDAO HUAZUN MACHINERY CO.,LTD.

Honor
青岛华尊机械有限公司



历程
Course

2012年4月，大卷装系列喷气织机诞生；
2014年6月，RJA850系列喷气织机试验成功；
2015年3月，RJA860喷气织机投放市场；
2016年9月，RJA870喷气织机研发机试验成功；
2017年3月，RJA870喷气织机市场；
In April 2012, the big package series water jet loom was born.
In June 2014, RJA850 series air-jet loom test success.
In March 2015, RJA860 air-jet loom on the market.
In September 2016, RJA870 air-jet loom gauze machine test success.
In March 2017, RJA870 air-jet loom sell like hot cakes.

质检车间
Quality inspection workshop

[illegible]

Quality control department is very key to a company and tests all [illegible] parts. In the QC department, there are clearly divided area, such as ready to test district, qualified district, defective district those are all independent for totally banning unqualified parts to next procedure.

涂装车间
Painting shop

[illegible]

In the painting work shop, the company applies leading process of degreasing and rust free,then enters advanced painting line.The coating is epoxy resin.We adopt internationally advanced electrostatic painting device and electrostatic adsorption principle, to ban missed painting phenomenon and comprehensively seamless cover surface of workpieces.All primer, finish coat do drying treatment in order to raise adhesive force of painting. All painting [illegible] of all painting make test of 8% salt spray with 72 hours according to rust surface treatment project.

流水线组装
Assembly line

[illegible]

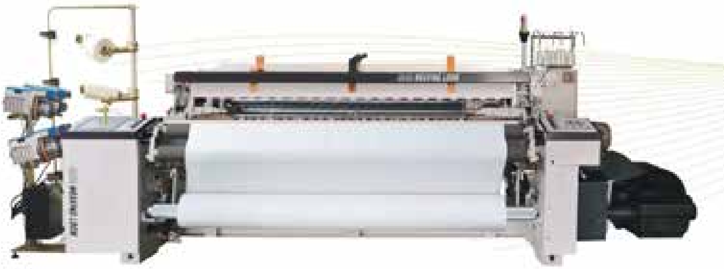
This company uses the Whole machine assembly line, through the strict quality management, fine differentiation assembly process flow, with the profession of tool set torque [illegible] to [illegible] optimizes product's quality control, through whole assembly line's tackles, we have the strict requirements about production facility's stability, cost efficiency and quality to ensure whole machine's assembly is qualified by 100%.

整机运行检验区
Whole machine operation inspection area

[illegible]

After the loom is assembled, transfer to the waiting area. All machines are tested in this area, and the test time of each car is not less than 8 hours. For a long time, the machine ensures the smooth operation of our looms, which makes the machine quality 100% qualified.

RJA860系列喷气织机
RJA860 AIR JET LOOM



1.RJA860型喷气织机，设计结构紧凑，方便用户操作。

2.[illegible]

3.[illegible]

4.[illegible]

5.[illegible]

6.[illegible]

1. RJA860 air jet loom, the design compact structure, convenient user operations.

2. Beating mechanism adopts frame structure, strong rigidity, beating-up force is big, small vibration, adapt to high speed weaving, also have good adaptability to high weaving high-density fabric.

3. Vice spray using [illegible] structure, reduce nozzle injection time, through to the nozzle jet the precise control of time, further reduce gas consumption.

4. [illegible]

5. The electronic let-off and electronic take-up, with functions of automatic search weft, eliminate the stop marks and variable weft density weaving, and other functions.

6. Open form, the optional crank openings, underneath type CAM and underneath type dobby and jacquard openings.

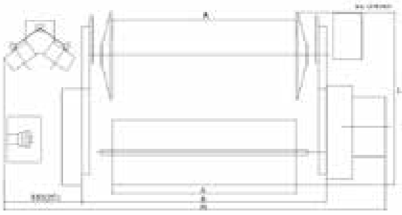
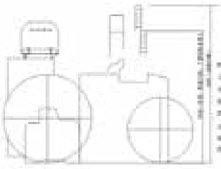
尺寸
Dimensions





盘片直径Flange dia	800
L	1950

注：
[illegible]

Note:
Figure in the "L" section is the dimension for the flange diameter of 800mm.For details of other specifications please contact us.
When the flange diameter is 800mm to 1000mm,[illegible] is required according to the beam mounting position.

公称筘幅Reed space cm (inch)		190(75)	210(83)	230(91)	250(98)	280(110)	340(134)	360(142)
W(L)	[illegible] Negative cam	3990	4190	4390	/	/	/	/
	[illegible] Positive cam (STAUBLI 1661)	4330	4530	4730	4930	5230	5730	5930
	[illegible] Rotary dobby (STAUBLI 2200)	4420	4620	4820	5020	5320	5920	6120
	A	1900	2100	2300	2500	2800	3400	3600
B		2540	2740	2940	3140	3440	4040	4240

注：[illegible]

Note:Figures in the "W" section are the dimensions for a 2-color loom with out the [illegible]. for other specifications please contact us.

技术参数 Specifications

项目		标准规格	选用件
[illegible]		[illegible]	[illegible]

注：[illegible]

技术参数 Specifications

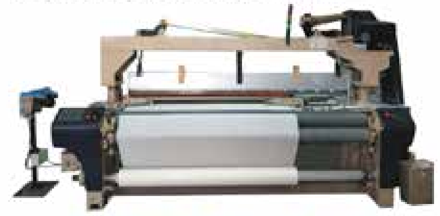
Item		Specification	Option
Reed space	Nominal(cm)	150,170,190,210,230,250,280,340,360,390	
	Useful weaving width	Same as nominal width	Maximum reduction 80cm (for 150-230cm)
		Maximum reduction 60cm(for 150~250cm loom)	
		80cm(for 280cm or wider loom)	
Weavable range		Spun: Ne100-Ne2.5	
		Filament 20den-1000den	
Driving	Starting method	Direct start of super start motor drive	
		Push-button operation with both hands	
		Slow inching with an inverter(Forward, reverse)	
	Motor capacity	2.7kw,3.0kw,3.7kw,5.0kw(jacquard shedding)	
Weft insertion		Main and sub-nozzles combined system	
		Auxiliary main nozzle	
		Stretch nozzle	
	Weft color selecting	Independent sub-nozzle timing control by color	
		Sub-nozzle doubling system	
Shedding		Crank plain shedding shaft number 2	
		Positive cam shedding shaft number up to 8	[illegible] shedding shaft number up to 10
		Negative dobby shedding(Electronic Floor-mounted)	
		shaft number up to 16	
		Jacquard shedding	
Let-off		Double-side electronic let-off with backward function	
		With negative easing or positive easing	Double beam
	Flange diameter	800mm,914mm,1000mm	
Take-up	Maximum cloth roll take up diameter	[illegible]	
	Pick density	MTU [illegible] picks/cm([illegible] picks/inch)	
		ETU [illegible] picks/cm([illegible] picks/inch)	
	Woven length counter	Display on function panel (meter, yard), with preset counter function	
	Temple	Top-mounted type [illegible]	Low-mounted type
		Press roll lift up with a handle operation	
Beating		Crank type beating, multiple-stay sword bearing	
		4 links (Reed space up to 230 cm)	
		6 Links (Reed space 250cm or more)	
		[illegible]	
[illegible]		[illegible]	
Weft supply		[illegible]	
Stand		Floor mounted for [illegible] packages [illegible]	
Selvage formation		Planetary gear motion	
Cutter		Mechanical cutter	
Lubrication		[illegible]	[illegible]
Stop motion	Weft yarn	Reflective weft feeler	
		Two-head system	
	Warp yarn	Electric 6-row contact bar system	
	Others	Stop motion for selvage and catch cord yarn	
	Stop cause indication	Indicated by message on [illegible] monitor	
		4-color multi-function indication lamp	
Weave Mgt. control System	Function panel features	Automatic control, troubleshooting, self-diagnosis function	
		Operating data indication, maintenance data indication	

For special design ,please contact [illegible] sales staff.

RJA870系列喷气织机
RJA870 AIR JET LOOM

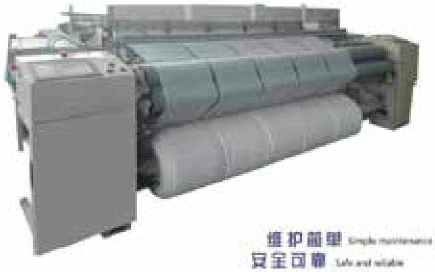
1.[illegible]
2.[illegible]
3.[illegible]
4.[illegible]
5.[illegible]
6.[illegible]
7.[illegible]
8.[illegible]

1.The RJA870 air jet loom is [illegible] in the market of water jet looms, especially for the manufacture of chemical filament yarn.
2. It adopts the [illegible] of water jet loom, adopts four link beating up structure, the beating up structure has stable movement and small vibration, and is suitable for high speed weaving.
3.The auxiliary spray adopts [illegible] structure, and the auxiliary spray solenoid valve is fixed on the front upper beam to shorten the length of the [illegible] and reduce the pressure loss.
4. The main injection and auxiliary injection time are precisely controlled to save energy and reduce consumption.
5. It uses computer screen operation, parameter change is convenient, workers can learn quickly and fully grasp and quickly apply.
6. electronic let off, electronic take-up, automatic weft insertion and elimination of stop step function.
7. adopting multi-[illegible] beating up mechanism, the whole machine vibration is greatly reduced.
8. shedding: [illegible] crank shedding, upper mounted cam and upper mounted dobby.



高品质 低耗能 无污染
Superior quality Low power consumption Pollution-free

RJA870型纱布喷气织机
RJA870 GAUZE AIR JET LOOM



维护简单 Simple maintenance
安全可靠 Safe and reliable
性能卓越 Excellent performance

1.[illegible]
2.[illegible]
3.[illegible]
4.[illegible]

1.RJA870 medical gauze air-jet looms, let off, take-up, temple and so on, are suitable for the weft density manufacturing.
2.According to user's requirements, the middle opening mechanism can be configured to achieve multiple weaving.
3. In accordance with the requirements of the user, optional outfit is optional.
4. The type of shedding is usually crank shedding.

RJA870系列喷气织机
RJA870 AIR JET LOOM

电子送经装置
Electronic let-off

[illegible]

To detect the total [illegible] of warp yarns through tension sensor, the CPU handles the change of warp yarns tension caused by shedding or [illegible], let-off, take-up's change of warp beam, and instructs the servo motor to drive warp beam, thus, this can keep the balanced tension in working procedure and [illegible], ensure the fabric equilibrium [illegible]. The machine adopts rigidity frame, warp beam gear with large diameter and positive [illegible] driving shaft which is built-in oil bath, which makes the weaving machine [illegible] to realize high speed and can be more sensitive to adapt the weaving requirements for high density fabrics.

卷取装置
Take-up device

[illegible]

We adopt two forms of take-up: mechanical continuous take-up and electronic take-up. It is very effective to prevent the stop-mark to combine with electronic let-off to accurate forwarded and reverse.

双探头探纬器
Double probe feeler

[illegible]

Double probe feeler, it is not only to discovery short or bending weft, but also to find the weft which was blowed, thus to ensure foolproof.
